## *My Knowledge*

- 8 years of total web experience with 3 solid years of PHP, MySQL, and jQuery scripting.
- Understanding of industry development and production software: Adobe, FTP, etc.
- Hands on experience with Windows [2003] and Linux [Ubuntu] web servers.
- Adaptive learning ability to take on any programming language and learn it from examples.

## *My Experiences*

- Webmaster @ *William Alan Corporation* (October 2008 → Today)
  - Worked on hundreds of small, focus sites using SEO, PPC, and Google Optimizer.
  - Took the lead on multiple large member sites at once + setup social networking accounts.
  - Unofficial tech support and go-to guy for technology issues. Mostly anti-virus and network.
- Lead Programmer @ *Adviatech* (June 2009 → Today)
  - Was responsible for turning layouts into functional, Wordpress layouts.
  - Also wrote additional plugins to extend the themes to client's specifications.
  - Did some troubleshooting and tweaking for past projects.
- High School Web Intern @ *Lockheed Martin* (June 2008 → August 2008)
  - Personally made a linkage used by over 1,300 engineers for frequently used tools.
  - Mentored in other projects such as the Global Visions and Solutions Center (simulations).
- Project Manager @ *Crooms Academy of Information Technology* (Fall 2006 → Spring 2008)
  - Using Wordpress as a model, made a custom CMS with news and a powerful search.
  - Built internal repair tracking tool which used student and part info from an active directory.
  - Both sites authenticated users using LDAP and gave them permissions based on group.
- Attended Google I/O in San Francisco, CA (May 2009)
- Attended the Future of Web Apps in Miami, FL (February 2008)

## *My Education*

- University of Tampa (Fall 2008 → Spring 2009)
  - Majoring in Management Information Systems.
- Accepted to Johnson and Wales University in Providence, Rhode Island.
- Accepted to Devry University in Orlando, Florida.
- Crooms Academy of Information Technology (Fall 2004 → Spring 2008)

*Note: The heading is a joke by using PHP to write my name. Fact: echo is faster than print\_r!*
